Problem Statement

The e-commerce brand is experiencing customer drop-off due to a cluttered layout and confusing navigation. The goal is to create a clear homepage structure that improves user flow, highlights products, and guides users toward key actions.

Design Goals

- Improve content hierarchy
- Simplify navigation
- Highlight key products
- Increase CTA visibility
- Create a logical user flow

Key Insights

- Users should immediately understand where to shop.
- The hero section should direct users toward products.
- Best-selling products should be highly visible.
- Categories should help users navigate faster.
- CTAs must be clear and easy to find.
- The layout should reduce confusion and improve the shopping experience.
